Subject: Gypsy Moth: Please add to agenda and circulate
Date: Thursday, November 19, 2020 3:51:21 PM

Please add this email to the Council Agenda for the Council Meeting on December 1st. Please circulate to Council Members.

To:
Stephanie Troyer-Boyd

Municipality of Lambton Shore

7883 Amtelecom Parkway

Forest ON N0N 1J0

The Gypsy Moth Outbreak is the one issue that has impacted and upset almost every citizen of our community. The immediate impact of the mess of the caterpillar infestation in the spring to the potential loss of our trees are very real sources of worry and concern.

The neighbourhood associations have worked very hard, investing hours of work in research and communications within and between neighbourhoods, evidence of how important this issue is and how invested we are in finding a solution.

The aerial spraying program is the most effective solution with tall trees and properties bordering municipal and other public land. There are a lot of barriers to implementing an aerial spraying program without the help of the municipality.

With real life examples of other Ontario municipalities, where aerial spraying programs have been successfully implemented, Lambton Shores has an opportunity to borrow from their recent experience and help our community.

Please consider taking on a more active leadership role and helping your neighbours with this very real problem.
