Nov 17, 2020

Stephanie Troyer-Boyd, Clerk

Please add to the Dec 1 meeting Agenda and circulate to council .

Dear Mayor Bill and other Members of Council

Both of us strongly support aerial spraying en masse of the affected Lambton Shores areas in the spring of 2021 - as much as possible - to address our gypsy moth infestation .

We are reassured by the science behind the spraying and the experience of other areas , and are satisfied that it is our best option to prevent a worse experience than summer 2020 which adversely affected our trees, homes, yards and quality of life . If not resolved we believe it will also negatively affect property values in general.

Please facilitate this request , and continue to support your constituents in any way possible in this matter.

Sincerely
Deborah McNaughton
