Describe your Drinking Water System	
The Water System serving East Lambton Shores receives treated water from the	
Lake Huron Water Supply System. Consisting of a control chamber at the vicinity of	f
Pinetree Drive and Lakeshore Road, controlled by the level of the elevated storage	
tank having an available storage volume of 3,725 m3 equipped with a chlorine	
analyzer to continuously monitor chlorine residual entering the system, two metering	3
pumps with variable flow control using sodium hypochlorite solution together with	
system controlling all levels and functions through the SCADA system located on site	<b>:</b> .
The Municipality of Lambton Shores has undertaken an upgrade to the entire water	
system to allow the people of the Municipality to have safe drinking water. The	
upgrade includes new water mains to the Towns of Thedford and Arkona. These	
water mains will supply water from the Northville Elevated Tank. The Northville	
Elevated Tank is supplied from the Lake Huron Water Plant which flows through	
the recently constructed Grand Bend Bypass.	
To allow the flow of water to the town of Arkona, a new Booster Station was	
constructed to push the water uphill to the town. The Town of Thedford is gravity	
feed from the trunk water main at the Booster Station.	
leed from the trunk water main at the Booster Station.	
A SCADA network has been established between the above noted sites using the	
Municipalities wireless communications network to allow the passing of information	
between PLCs.	
List all water treatment chemicals used over this reporting period	
Sodium Hypochlorite	
Souldin Hypochionite	

#### Were any significant expenses incurred to?
